

Autry Technology Center Connected Me to My Future

Picture yourself in your future and develop your career at Autry Technology Center

Drew Rupert is on his way to a career in Fire Safety. After learning about the many programs at Autry Technology Center, the great job opportunities and the chance to earn college credit while still in high school, Drew knew Autry was a part of his future. He enrolled in the Firefighter Program...

Drew completed Autry's program during his senior year at Enid High School. Last fall, he enrolled at OSU-OKC to work towards a Municipal Fire Protection Degree. Thanks in part to the college credit he earned while at Autry, Drew will complete his Associates Degree this summer and then plans to take a one-year paramedic program. He will be ready to work—and well prepared for a successful career—by 2007.

He credits much of his success to his instructor at Autry. "The instructor's passion for his career encouraged us all and I think we all got even more out of the class than we had expected," Rupert remembers. He also appreciates the assistance provided by the Educational Enhancement Center, one of the many student services designed to help prepare students for workplace success.
